## Internships Available at Scienomics

Scienomics (www.scienomics.com) has positions available for internships in the development of scientific software. These positions require good working knowledge of either C++ or Python and an interest in the development of graphical user interfaces to scientific software. The candidates will deal with the entire process of commercial software development in the area of simulation of materials starting from the analysis of the requirements, through design and coding of the software to documentation and quality assurance of the code. It is expected that each candidate will be responsible for a small project including a research project related to the development. Working place can be either Munich, Athens or Cambridge (UK). Please send applications for the positions to info@scienomics.com which clearly state the reasons for your interest, your current skill level and the expected time frame of your availability.

ABOUT SCIENOMICS: Scienomics is a niche scientific software company dedicated to serving Chemicals, Materials, Personal & Home Care, Microelectronics, Automotive and Aerospace industries while also catering to Universities and Government Labs. Scienomics' multiscale modeling and simulations software, based on fundamental principles in chemistry, physics, nanotechnology and materials science, allows to address business critical scientific problems of our customers. Using this software Scienomics' scientists and engineers provide excellent services such as Training, Consulting, and Contract Research Services.
